# Remote Control Flying Best Practices

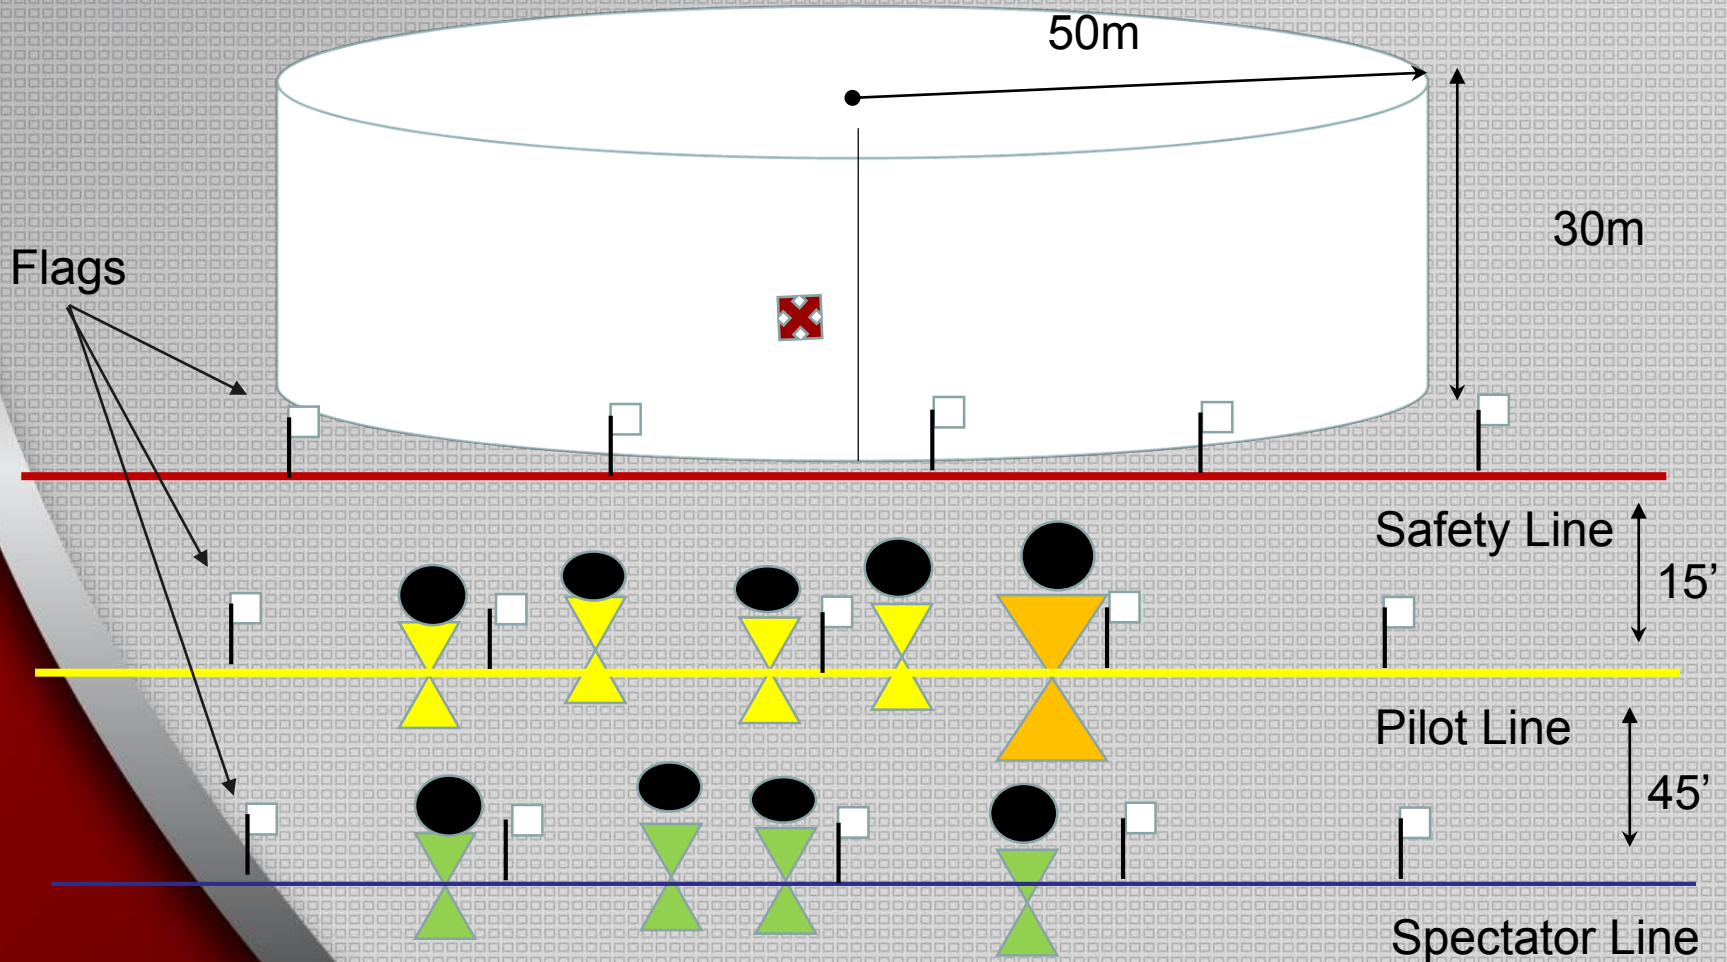

- FAA has recognized the following as best practices / community standards for recreational drone flight.

# Site Layout

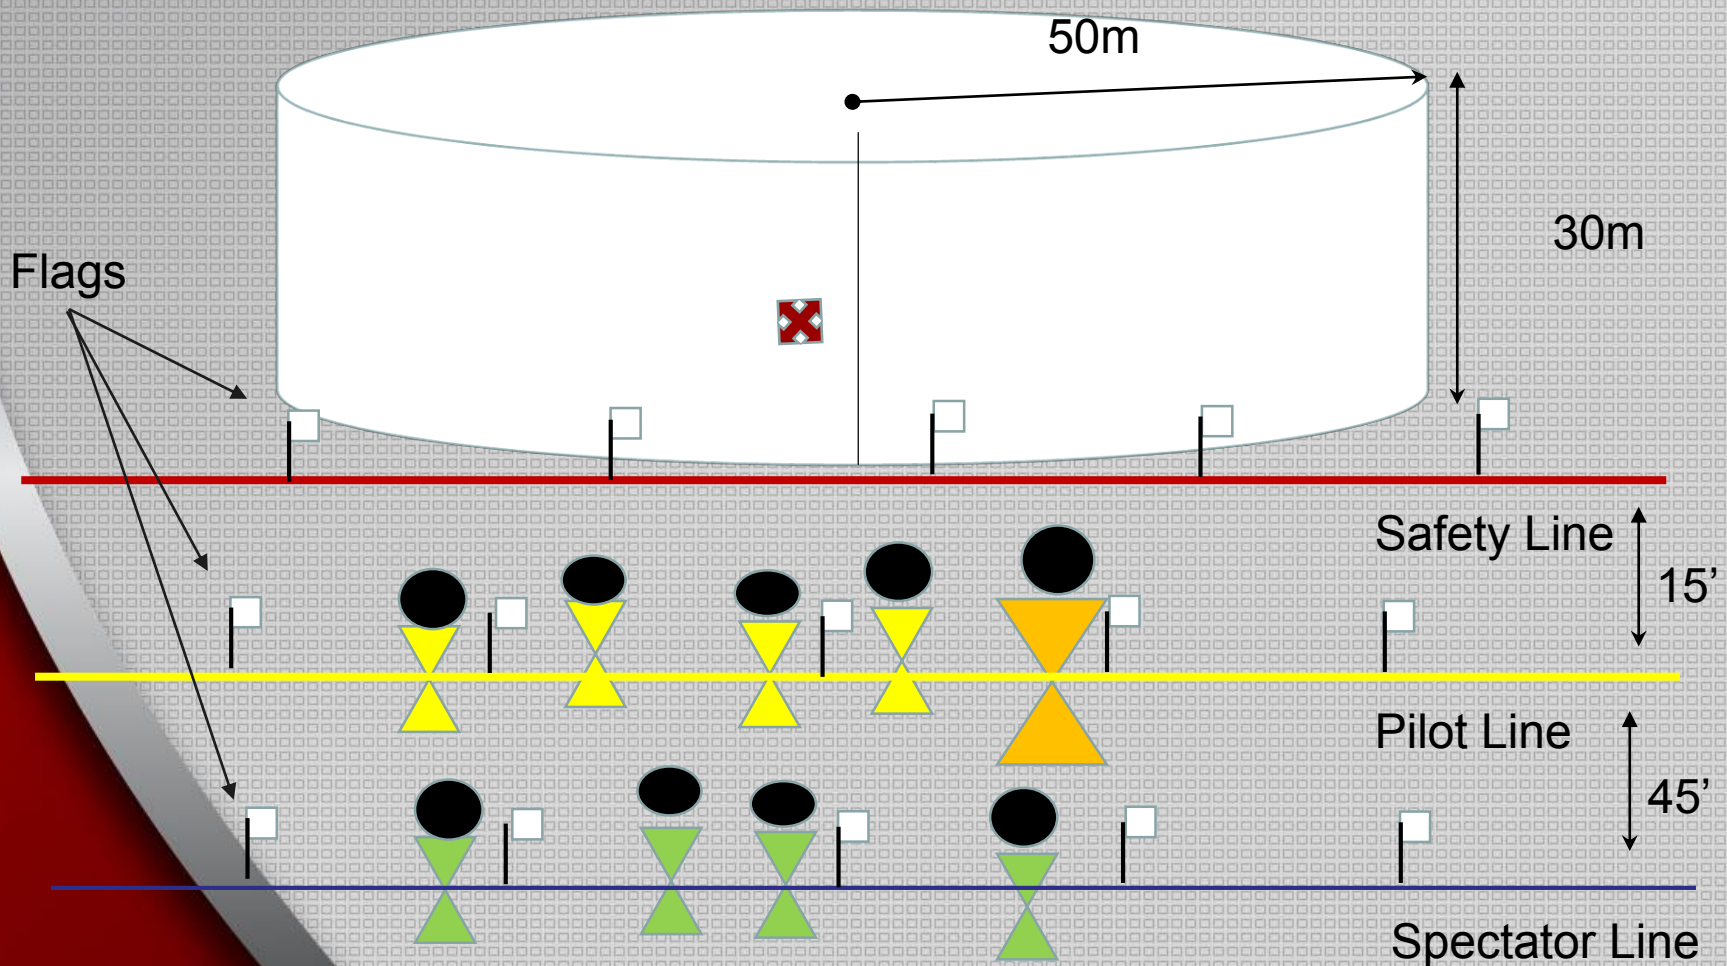

- Locations Distance Factor
  - Take Off point marks should be 15' - 20' beyond the Safety line
  - Pilot Line 15'-25' from Safety Line
  - Spectator Line 50' – 65' or more from Safety Line

# Flying Area Set Up

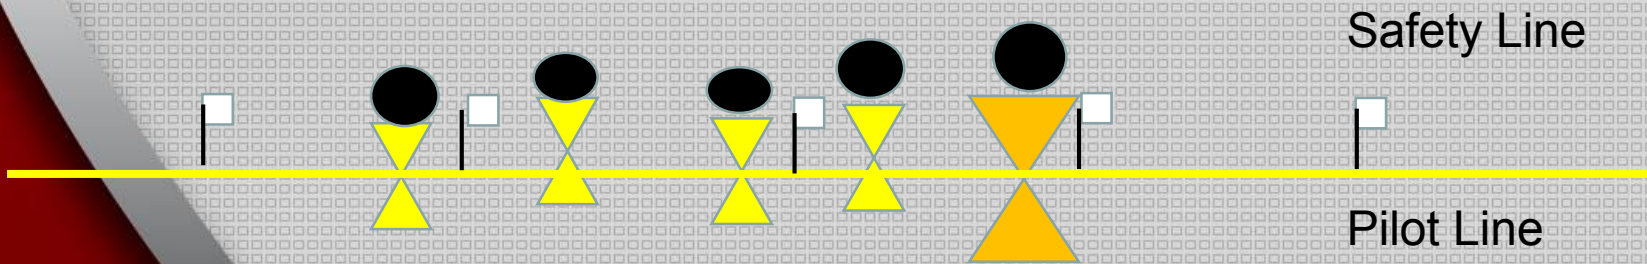

Take Off point should be 15' - 20' beyond Safety Line

# Altitude and Distance Limits

# Games and Racing

# Before You Start Flying

- Use a simple 10 question test they must pass before they can fly
- Have the students help set up the flight line to reinforce safety
- Use safety vest for flight crews
